

1 day before

- Pack a box of things you'll need as soon as you arrive at your new home. Take this box with you, or have your Piece by Piece driver load it last and unload it first.
- This is usually the day packing is done; verify all packing services have been performed before signing for them.
- Defrost, clean and dry your refrigerator.

Moving Day

- Plan to be at your current home when our driver arrives and throughout the loading of your shipment. If you're not able to be there, make sure the driver has the name and number of the person you've designated to oversee the process.
- Check the condition of your goods as they are inventoried and loaded.
- Make a final tour of your home/property and verify that nothing has been overlooked.
- Sign the Bill of Lading, double-checking that your new address and phone number are correct.
- Lock all doors and windows and turn off all switches.

Moving in...

- If possible, arrive at your new home a day early to make sure utilities are connected.
- Plan the placement of major items in/around your home.
- Be on hand to pay the driver prior to the unloading of your goods.
